Title: Order-to-Cash (O2C) Cycle in SAP SD

NAME: VAISHNAVI UTTAM KUAMR
ROLL NO: 2305178
BATCH: B.Tech CSE

---

1. Introduction

The Order-to-Cash (O2C) cycle in SAP SD (Sales and Distribution) is a complete business process that starts from receiving a customer order and ends with receiving payment. It plays a critical role in organizations by managing customer transactions efficiently.

The O2C cycle integrates various departments such as Sales, Inventory, Shipping, Billing, and Finance. It ensures smooth flow of information and helps in better decision-making.

SAP provides an automated system to manage this cycle, reducing manual errors and improving efficiency.

---

2. Problem Statement

In traditional systems, handling customer orders manually leads to:

- Errors in order entry
- Delays in delivery
- Poor tracking of payments
- Lack of coordination between departments

There is a need for an integrated system that can handle the entire sales cycle efficiently.

---

3. Solution (SAP O2C Process)

SAP SD module provides a structured solution to manage the entire O2C cycle.

◇ Steps in O2C Cycle:

1. **Customer Master Creation**
    - Stores customer details like name, address, payment terms
2. **Material Master Creation**

    - Stores product details like price, quantity
3. **Inquiry**
    - Customer requests product information
4. **Quotation**
    - Company provides pricing and terms
5. **Sales Order Creation**
    - Customer confirms purchase
6. **Availability Check**
    - System checks stock availability
7. **Delivery Creation**
    - Goods are prepared for shipment
8. **Picking & Packing**
    - Items are packed
9. **Goods Issue**
    - Stock is reduced
10. **Billing**

- Invoice is generated

11. **Payment**

- Customer makes payment

---

4. Features of O2C Process

- Real-time tracking
- Integration with FI (Finance)
- Automated billing
- Inventory management
- Reduced manual errors

---

5. Tech Stack

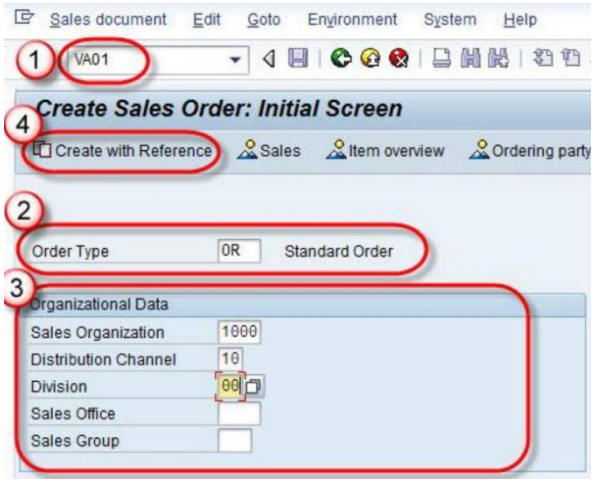
- SAP ERP

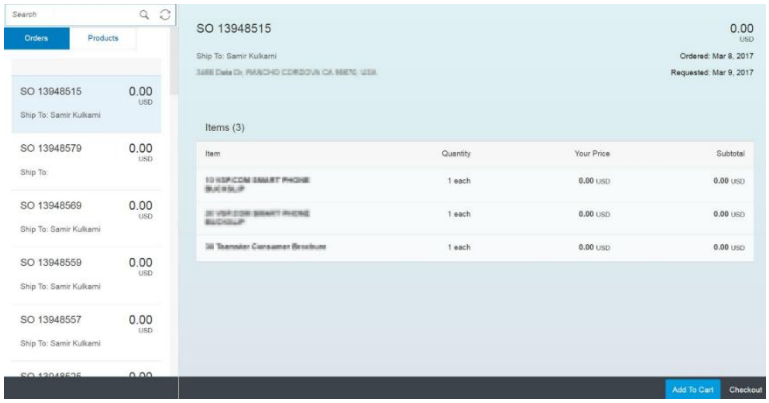
- SAP SD Module
- SAP GUI

---

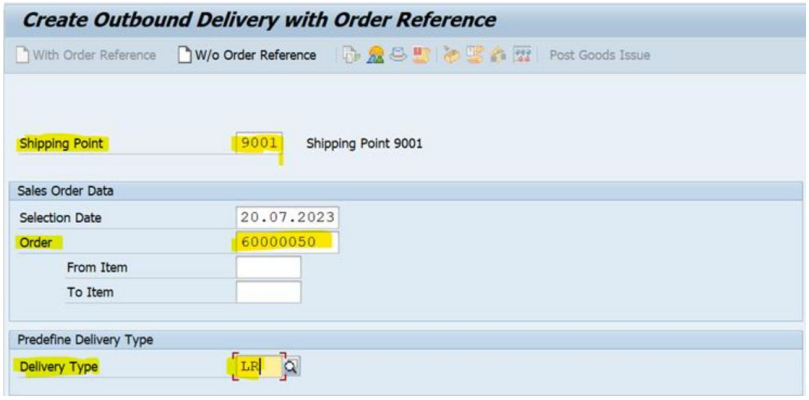
6. Screenshots

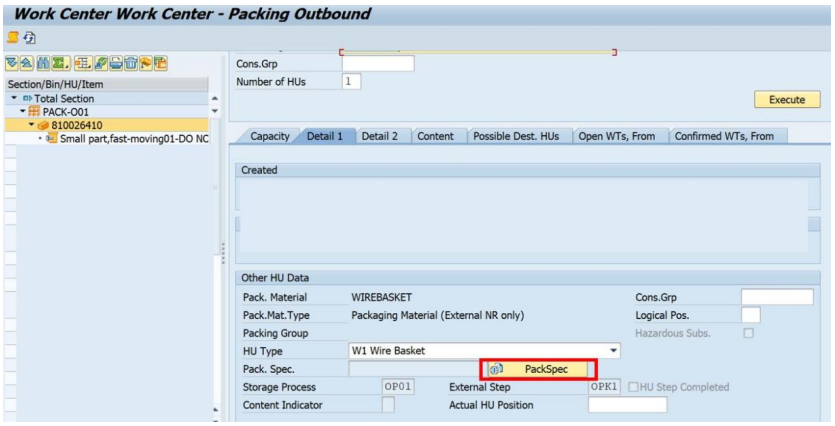
- Sales Order screen



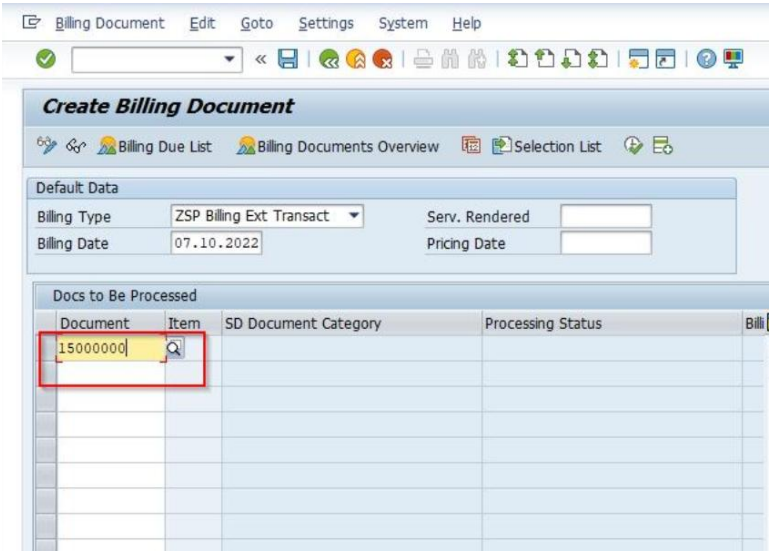


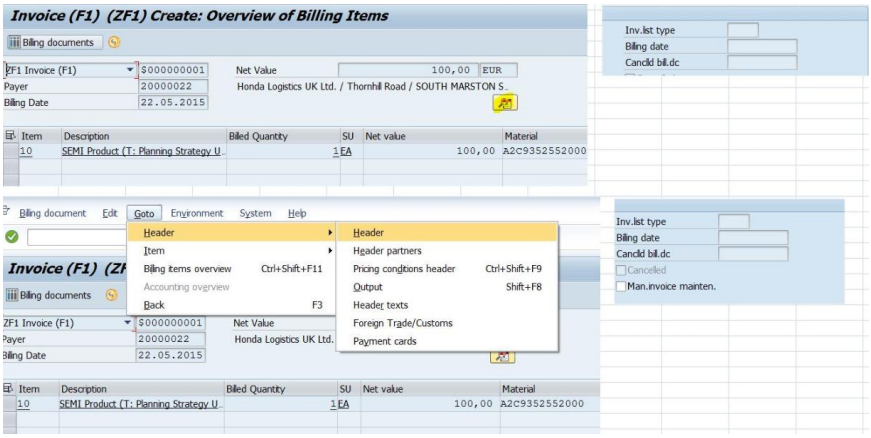
- Billing screen

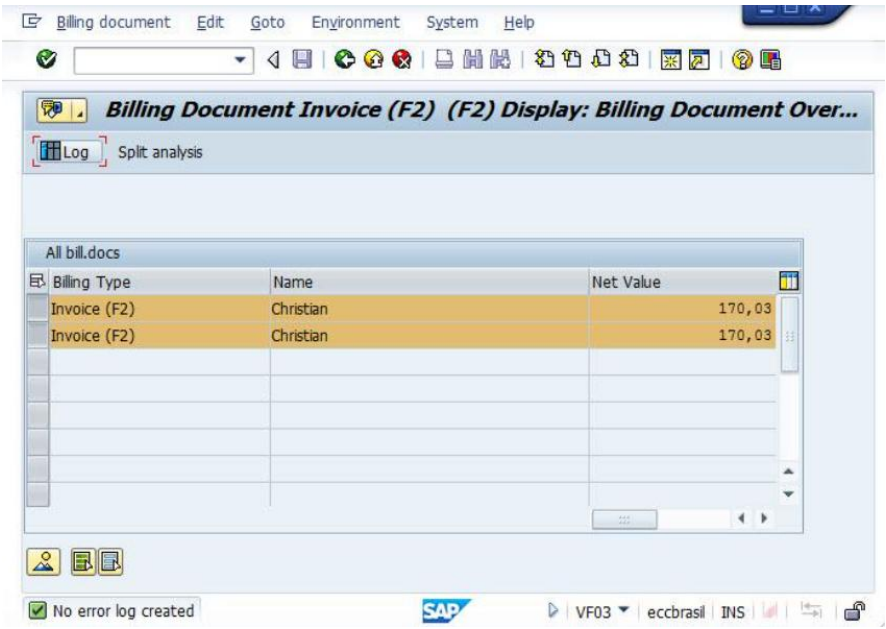




- Delivery screen







7. Unique Points

- End-to-end automation
- Improves customer satisfaction
- Reduces processing time
- Better financial tracking

---

8. Future Improvements

- Integration with AI for demand prediction
- Automation using chatbots
- Real-time analytics dashboards

---

9. Conclusion

The Order-to-Cash cycle is a crucial business process in SAP SD that ensures smooth execution of sales operations. It improves efficiency, reduces errors, and enhances customer experience.
